

On March, 6th the women conference passed in church.

The theme of conference was "The Man and the woman". The head of women service Ludmila Gerchikova conducted this fellowship . During this service the essential spiritual questions, concerning missions of the man and the woman in a family have been mentioned.

When God created Adam and Eve, He defined to each of them a role in a family. The plan of God was good, but, unfortunately, many bible principles are now broken and consequently it is necessary to come back to them. Eve, the first having plucked a forbidden fruit, has earned for all daughters superiority. And this superiority which has been started up in a right direction, just will restore God the established order.

Women who gathered in church, received many important lessons for themselves which need to be used constantly in their life. During fellowship women had a cup of tea and sweets.

Women thanked the Lord for this possibility to gather and have expressed desire more often to gather for similar fellowship.
