If video isn't played on your device,

there can be several reasons:

Most likely, you haven't installed Adobe Flash Player, or it wasn't updated. You can download the latest version of Adobe Flash Player from their official site: **https://get.adobe.com/flashplayer**

To watch movies on the tablet or the mobile phone, you have to install Puffin browser from Play Market (AppStore). It is for free.

There is another way for Android platform devices. You need to install Adobe Flash Player which can be downloaded:

- For Android 6.0 (For phones since 2016 on the android of 6.0 Marshmallow) - **to download**

For installation you will need to come into "Settings", further into the section "Safety" and to put a tick in "Unknown sources".

- For Android 5.0 Lollipop (For phones since 2014 on the android of 5.0/5.0.1/5.1.0/5.1.1 Lollipop) - **to download**

Video tutorial for installation:

- For Android 4.4.x KitKat (For phones since 2013 on the android of 4.4.1/4.4.2/4.4.3/4.4.4 KitKat) - **to download**

Video tutorial for installation:

Besides, you need to install the Dolphin browser on your tablet (phone) and watch movies in it.

**To download the Dolphin browser**

And finally, if you have passed to the page with Video not from our website, but from the external reference, including a search engine, the error in playing can appear.

In this case, select on the homepage of our website a menu item, for example **"Video online"** , then, having entered there, choose the movie necessary to you from the list. In most cases it helps.
